Department of Mechanical Engineering ACTIVITY REPORT

Name of the Activity	One day workshop on IPR and Patents
Type of Activity	Co- Curricular
Date and Time	13/08/2022, 10 AM to 11.30 AM
Details of the participants	15 Faculties
Organizing Department	Mechanical Engineering
Details of resource person	Dr. V. H. Deokar

The best way to secure the information for a trade secret is to restrict access to the secret and have individuals and companies sign nondisclosure agreements with you should you enter into a relationship with them which will require them to know some aspects of the secret. If someone independently develops or reverse-engineers your trade secret, there's nothing you can do. If someone does leak it, you can sue for theft. Suing, however, cannot stop the person from using the leaked information. So although you may get money from the suit, you lose the larger potential profits you could have made from the idea. Still, if your luck holds and your trade secret remains secret, royalty income from it can last significantly longer than the patent period.

Prof. D. V. Patil
