#### ABOUT THE SANJEEVAN

Sanjeevan Engineering and Technology Institute (SETI) is an establishment of Sanjeevan, meets the needs of technology driven modern 21<sup>st</sup> Century. The Institute is approved by All India Council for Technical Education, New Delhi, recognized by Directorate of Technical Education, Govt. of Maharashtra and affiliated to Shriji University, Kolhapur. Sanjeevan Engineering & Technology Institute (SETI) is long cherished dream of Founder- Chairman Mr. P. R. BHOSALE, an Educationalist having experience about two decades. His aim is to impart quality education to the students from nook and corner of the country. No doubt, Sanjeevan Engineers will be the best professionals with added values of Indian Heritage. The college is offering undergraduate degree courses in Computer, Civil, Mechanical, Electrical. All above courses are approved by

AICTE New Delhi & affiliated to DBATU

#### SCOPE AND OUTCOME OF WORKSHOP

Concrete mix design is the science of choosing the types of ingredients, and the proportions to

use them in, to create concrete that meets the technical specifications for a given construction project. The concrete mix design consists of selection of optimum proportion of cement, FA, CA and water to produce a concrete of specified properties. The most specified properties of concrete are compressive strength, workability, durability. As we know that strength is governed by w/c ratio of concrete. A good concrete mix design creates the foundation of a sound infrastructure. Concrete mix design involves a process of preparation in which a mix of ingredients creates the required strength and durability for the concrete structure.

#### OBJECTIVES OF WORKSHOP

- To Understand Principles of Cementitious supplementary substance added in the cement.
- To Understand the effect of ingredients used in concrete (F.A. and C.A ratio).
- To study the role of admixture used in concrete.
- To give hands on training to participants of Mix Design.

## Research Methodology

### Seminar on RESEARCH PROCESS

By

Mr. Dhananjay Vasantao Patil  
Research Scholar  
Mechanical Engineering

## Define Research

Research can be defined as,

- The search for knowledge
- Scientific and systematic search for pertinent information on a specific topic
- Research is an art of scientific investigation, to establish novel facts, solve new or existing problems, prove new ideas, or develop new theories.

## 7 steps of research process

- Step One: Define research problem
- Step Two: Review of literature
- Step Three: Formulate hypotheses
- Step Four: Preparing the research design
- Step Five: Data collection
- Step Six: Data analysis
- Step Seven: Interpretation and report writing

## Research process in flow chart

### Step One: Define research problem

Essentially two steps are involved in define research problems

1. Understanding the problem thoroughly
2. Rephrasing the same into meaningful terms from an analytical point of view

### Step One: Define research problem

Corrosion of washing machine body

Chemistry involved in rusting of iron

### Step Two : Review of literature

- For this purpose Manuals, Company Records, Journals, published data can be used.
- Literature review is integral part of entire research process and makes valuable contribution to every operational step
- Review literature can be time consuming and frustrating but is also rewarding . Its function are:
  1. Bring clarity and focus to research problem
  2. Improve methodology
  3. Broaden knowledge
  4. Contextualize findings.

### Step Three: Formulate hypotheses

- Formulate hypothesis is tentative assumption made in order to draw out test its logical or empirical consequences
- Hypothesis should be very specific and limited to the piece of research in hand because it has to be tested.
- The role of the hypothesis is to guide the researcher by delimiting the area of research and to keep him on the right track.
