PARIKRAMA 2K17

As per the trend of today's world, we the peoples from SANJEEVAN family also organized a technical event called PARIKRAMA 2K17. Organizing a technical event feels like pride & honor which we use to organized every year. The event was scheduled on 15th March 2017 for seven different branches as Mechanical, Electrical, E&TC, Computer, Civil, Automobile & General engineering.

Among this we the faculties of Electrical Engineering Department have arranged four most popular & up growing events in it like Paper presentation, Poster presentation, Instant idea representation & Project exhibition. The number participants collectively involved in different events was around 163 from several nearby reputed colleges. The prizes given to the winners were around of 1 Lakh rupees along with smart & decent trophies.

The feedback from participants of outside colleges & our college were good. Some suggestions also come from the student end & we promise them that we will think on your suggestions for our betterment.

I all the event was wonderful for participants as well as for organizers too.
